Why: A Revolutionary Product That Is The First To Target The Bones

When: September 26th, 2014

Where: Yorba Linda, California

About Boneo Canine®:

[Boneo Canine®](#) Maintenance Formula is an innovative supplement that helps support strong bones and healthy joint function in dogs.

Traditional glucosamine, chondroitin and MSM supplements only support one aspect of your dog's skeletal health--the joints. Boneo Canine® is different, this protein-based supplement is the first of its kind to support the joints AND the bones, a unique all-in-one product. The multi-functional formula contains patented Neo-Portin® Complex, a blend powered by ribonuclease-enriched lactoferrin (R-ELF). R-ELF is a natural, lactose-free, milk-derived protein that has been clinically shown to help maintain strong bones and enhance bone turnover activity, while still offering the benefits of traditional supplements by actually supporting healthy joint structure. Boneo Canine's® Maintenance Formula is safe for long-term use and recommended for dogs of all ages, sizes and breeds.

Boneo Canine® was recently awarded for the being the number one all-natural pet product in the United States at the Total Pet Expo in Chicago, Illinois September 2014.
